Data Points

Notes from last JCIC meeting

Client data set

At the November JCIC meeting, all of the proposed new fields for the Client data set were approved. The new format will be required beginning with July 2005 data and the fields will be checked for accuracy and completeness beginning with July 2006 data.

Human Resources data set – Field name survey

The proposed new format for the HR data set was approved, with one exception. The JCIC members did not like the name "Credentials" for the fields that will be filled with Taxonomy codes describing each employee's area of specialty (the Taxonomy codes can be found at: http://www.rdmc.org//cmhc/reports/HR_Taxonomy_Brief.rpt). To find a field name that is more acceptable, we are conducting a survey:

Please e-mail Dennis Moore (Dennis.Moore@rdmc.org) with your preference for the new name for the field previously named "Credentials". Some proposed names:

- Taxonomy Code
- Job Classification
- Responsibility
- Specialty
- Profession

- Task
- Occupation
- Any others?

The name that receives the majority of votes will be the new "official" name of this field.

As soon as possible, the finalized layout for the FY 2006 Client and HR data sets will be available at http://mhmr.ky.gov/CMHC/cmhc_data_guide.asp.

"Unknown", "Not Collected", and "Not Applicable"

We provide data to the federal government quarterly through the Treatment Episode Data Set (TEDS). Much of our Client data set was designed to match the TEDS data set, including the original "8/98" code for "Unknown/Not Collected". TEDS has recently divided this code into "6/96" ("Not applicable"), "7/97" ("Unknown"), and "8/98" ("Not Collected"). The "Not Collected" code is used by TEDS to indicate fields they request but are not provided by the states. However, we use "8/98"-"Not Collected" to indicate that the question was not asked and "7/97"-"Unknown" to indicate that the client could not (or would not) provide the answer. We also convert most invalid codes to "8/98" to prevent multiple invalid codes in the field.

TEDS has divided up the "8/98" code, but does not yet require states to provide the data in the new code structure. We need to be ready to give them valid data when they make the switch. Centers should continue to use "7/97" - "Unknown" and "8/98"-"Not Collected" as defined *for Kentucky*. We will continue to count both as incomplete where indicated. The "6/96" ("Not Applicable") code should only be used in situations where the field does not apply to the client, such as the "Pregnant Women" field for male clients.

Language Codes

A report is available under the Data Set Guide listing all the ISO 639 language codes (on page http://mhmr.chs.ky.gov/CMHC/cmhc_data_guide.asp, under the "Reports" drop-down box). In this report, several languages are listed more than once. Some of these duplicates are due to different spellings of the "Language" title (for example, Mon-Khmer vs. Mon-Kmer); in these cases, the 3-letter code is the same for both spellings. Some of these duplicates are two different 3-letter codes for the same language. In these cases, the 3-letter code in the "Replace" column is the preferred code to use. For example, Spanish is listed as both SPA and ESL, but the ESL row lists SPA in the "Replace" column. This means that SPA is the preferred code but ESL will also be accepted. Upon receipt, we will convert ESL to SPA in our tables to simplify reporting. If you have any questions, contact Dennis Moore at RDMC or David Smith at DMHMRS.

An Excel version of this table is available under the File Management section of "Region Reports & Upload" or by contacting your liaison or Dennis Moore at RDMC.

Exact ICD-9 Codes follow-up

A listing of the ICD9 codes that duplicate valid codes when 'zero filled' is included at the end of this document. If you would like an Excel copy, please contact Dennis Moore (Dennis.Moore@rdmc.org).

Kentucky County Quiz!

For fun, see if you can name the Kentucky counties that answer the following questions (answers will appear next month).

Which Kentucky county has a name that…
 1. …you like to sing at Christmas?
 2. …is a Saint in red?
 3. …is a gift from one of the Wise Men PLUS a knight's title?
 4. …is the opposite of 'red, down'?
 5. …is an evergreen with large, glossy leaves?

Here are the answers to last month's quiz:

Counties that share a name with a US President: Washington, Jefferson, Madison, Monroe, Jackson, Harrison, Taylor, Lincoln, Johnson, Grant, Carter, Clinton

ICD9 Duplicates

Codes that 'zero fill' to a different valid code
